

PUPUT NOVIANTI

Fresh Graduate in Electronics Engineering

📞 08122-5040-340 ✉️ puputnovianti382@gmail.com

🏠 Semarang, Indonesia.

SUMMARY

Fresh graduate in Electronics Engineering from Politeknik Negeri Semarang with experience in electronics projects, PCB assembly, hardware troubleshooting, and microcontroller programming. Passionate about electronics, embedded systems, and technology development. Adaptable, detail-oriented, and able to work effectively both independently and in team environments. Experienced in supporting educational technology projects, creating technical documentation, and assisting hardware testing during internships.

PROFESSIONAL EXPERIENCE

Electronics Engineering Intern

PT Indomaker Indonesia Mandiri | 2025

- Designed and developed electronic trainer kits for educational and project purposes
- Printed and assembled PCB (Printed Circuit Board) components for electronic devices
- Created tutorials and learning content for the company website
- Assisted in testing and troubleshooting electronic circuits and hardware
- Collaborated with the team to support product development and technical documentation

STEKOM University Intern

STEKOM University | 2022

- Analyzed data and monitored campus learning activities
- Assisted in preparing and designing student learning materials
- Performed computer hardware maintenance and troubleshooting in the laboratory
- Supported administrative and technical activities during internship programs
- Collaborated with staff and students to improve learning support systems

PROJECT

- Arduino, ESP, and Raspberry Pi Trainer Kit
- Early Warning System
- Smart House with PID Control
- Ultrasonic Sensor as Radar
- Heater Controller with PID

LANGUAGES

- Indonesian (Native)
- English (Professional Working Proficiency – TOEIC Score: 755)

EDUCATION

Politeknik Negeri Semarang

Diploma Degree (D3) in Electronics Engineering
2023 – 2026

SMK Texmaco Semarang

Industrial Electronics Engineering
2020 – 2023

SKILLS

HARD SKILLS

- Electronic circuit assembly and PCB printing
- Arduino programming and microcontroller basics
- PCB design and electronic simulation using KiCad, Proteus, Wokwi, and Tinkercad
- Basic computer hardware maintenance and troubleshooting
- Hardware testing and electronic circuit troubleshooting
- Technical documentation and tutorial creation

SOFT SKILLS

- Communication and teamwork
- Time management
- Adaptability and problem-solving
- Responsible and disciplined
- Able to work independently and collaboratively
